🛡 Can work during blackouts

Skills

JavaScript (ES6+), TypeScript

Vue.js, React.js/Next.js, Redux, HTML5, CSS3/SCSS

Node.js, Nest.js, Express.js

PostgreSQL, Redis, MongoDB

AWS (S3, CloudFront, Lambda, Cognito), Docker, CI/CD

Git, Sentry, Jira/YouTrack

AI-Assisted Development: Claude Code, Cursor

Languages

English: B2 (Upper-Intermediate),

Ukrainian: Native

Courses

Software Engineering, *Genesis*
System design & architecture workshops with engineers from Solidgate, Headway, SKELAR, Universe

Node.js PRO [🔗](#), *RobotDreams*
Advanced backend engineering with NestJS, Microservices, and DevOps practices.

AWS Basics [🔗](#), *Fwdays*
Built serverless apps using Lambda and Cognito with S3/CloudFront deployment and IAM security.

Full-Stack Developer, *Mate academy*
PERN stack and TypeScript, 1000+ hours

Activities

Participant, NASA Space Apps Challenge
48-hour global hackathon using NASA open data.

Full-stack Engineer with 2+ years of commercial experience building high-traffic web applications using **Vue.js, React/Next.js, and Node.js**. Worked on e-commerce systems with **3.7M+ monthly users**, focusing on performance optimization and scalable product development. I integrate AI-assisted workflows (Claude Code, Cursor) to ship faster without sacrificing code quality.

Professional Experience

Freelance, Full-stack Engineer

02/2026 – Present

- Delivered full-stack solutions end-to-end: **Nest.js** backends + **React/Next.js** frontends
- Built data dashboards with charts, filters, and CSV/Excel export, plus an HR platform MVP
- Automated workflows via **Telegram bot** and third-party integrations (GitHub, Zoom, email)

Dnipro-M, Front-end Engineer

10/2024 – 02/2026 | Kyiv, Ukraine

- Improved **Core Web Vitals** by **43%** through frontend architecture refactoring and Webpack optimization, boosting SEO and retention
- Built a multi-page **Help Center** that reduced support load by **13%**
- Collaborated with backend and product teams to redesign search and filtering flows, **driving a 170% increase in search-to-sale conversion**
- Re-engineered the localization system — resolved stability issues, **achieved 2x faster** language loading

Education

Kyiv Aviation Institute, Bachelor's

2022 – 2026 | Kyiv, Ukraine

- Software Engineering degree with strong foundation in algorithms, OOP, databases, and system design

Projects

Release Owl

[\[GitHub\]](#) [🔗 \[Link\]](#) [🔗](#) Production-deployed email notification service for GitHub releases, built and deployed solo on a VPS. Hexagonal architecture (SOLID/GRASP) with dual REST + gRPC interfaces, extracted notification microservice, full test pyramid, and observability stack.

Node.js, TypeScript, Express, gRPC, PostgreSQL, Redis, Docker, Prometheus, Grafana, ELK, GitHub Actions

Student Service Desk

[\[GitHub\]](#) [🔗 \[Link\]](#) [🔗](#) Full-stack platform for dormitory repair requests (5,000+ residents): Telegram bot for residents, web admin panel for staff, with role-based access and CI/CD auto-deploy.

NestJS, Next.js, React, TypeScript, PostgreSQL, TypeORM, Redis, Docker, Nginx, GitLab CI/CD
